AGRIDATA

Partnership
**ANIMAL HEALTH
AND WELFARE**

➤ Expected in the WP 2023-2024
➤ Widely participated process, complex
and different for each partnership

https://ec.europa.eu/info/research-and-innovation/funding/funding-opportunities/funding-programmes-and-open-calls/horizon-europe/european-partnerships-horizon-europe/candidates-food-security_en

MIPAAF – Research and Experimentation office (DISR4) within European Research Area (*from 2004 until today*)

- Participation to ERA-Nets, ERA-Nets PLUS, ERA-Nets COFUND, CSA, EJP, JPIs (foreseen within the European Research programmes FP6, FP7, H2020 and Horizon Europe)
- Italian delegate in the Standing Committee on Agricultural Research (SCAR) at the EU Commission
- Represents Mipaaf in the Global Research Alliance on agricultural greenhouse gases and Wheat Initiatives

2013-2021 Financial contribution Mipaaf in ERA

10 mln of euros

(out of which around 3,25 mln for organic farming)

MIPAAF – Research and Experimentation office (DISR4) within Horizon Europe Partnership Cluster 6 process

Through the SCAR **Strategic Working Group Agroecology** ad hoc participates actively in the redaction of partnership factsheet and partnerhips proposals

Through the SCAR **Strategic Working Group Food System** has expressed avalaibility to contribute to the partnership factsheet and partnerhips proposals

The European network for observing our changing planet

Through the **ICT AGRIFOOD/ERAPLANET** consortium partecipates actively in the core group to contribute to the partnership factsheet and partnerhips proposals

CWGSAP
COLLABORATIVE
WORKING GROUP ON
SUSTAINABLE ANIMAL PRODUCTION

Through the SCAR **Collaborative Working Group Sustainable Animal Production** has expressed avalaibility to contribute to the partnership factsheet and partnerhips proposals

Partnership AGROECOLOGY

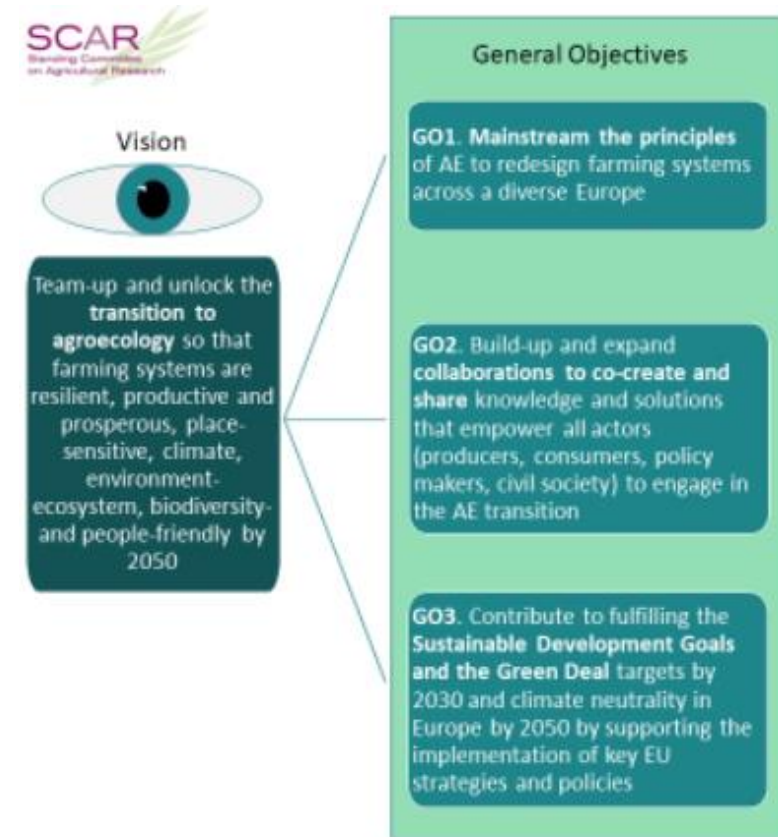

Partnership “Accelerating farming systems transition: agroecology living labs and research infrastructures”

Objective. The partnership aims to accelerate the transition towards sustainable, climate- and ecosystem-friendly farming practices through agroecological approaches. It indicates the main tools to be strengthened for the development of Agroecology (Living Labs and Research Infrastructures) already in its title. However, activities will cover a wider range of initiatives and forms of intervention.

State of art. The process aims to the preparation of a partnership “dossier”, coordinated by the SCAR Strategic Working Group on Agroecology (SCAR-AE) set up in early 2021. Its last version has been sent to the EC in April 2022. In 2022 the Strategic R&I Agenda (SRIA), requested by the Commission, is also being produced. These documents will be considered in the definition of the call that will be launched by the Commission at the end of 2022- beginning of 2023.

During the process, SCAR-AE has gathered inputs from a wide range of stakeholders, and received advice and support from other initiatives, in particular from three Coordination and Support Actions (CSA): All-Ready, AE4EU, SMS.

Involvement. Mipaaf and experts participate in the process with three representatives in the SCAR-AE group, contributing to the definition of objectives, activities, governance etc., and coordinate their activity with the representatives in other Cluster 6 partnerships.

Partnership FOOD SYSTEMS

Sustainable Food Systems for People, Planet and Climate

Objectives. This partnership aim at **accelerating the transition toward safe and secure diets for all, based on a sustainable food production** («for all» include the dimension of qualitative and quantitative food supply), developing and implement collectively a food innovation policy based on this mission all over Europe.

The co-development of multidisciplinary R&I programmes involving all relevant stakeholders will create a **European network of observers for the monitoring of the European Food Systems** and for implementing a wide range of activities to improve the impact of R&I and the leadership of EU in supporting sustainable food systems development, in line with the Green Deal and the Farm to Fork strategies.

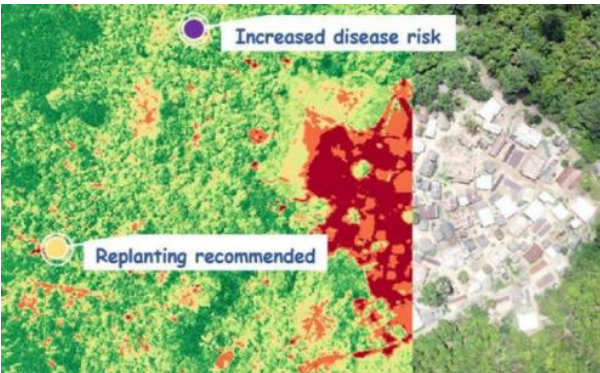

State of the Art. MIPAAF actively contributes in the SWG Food System, coordinated by INRAE (FR) and by the Finnish Ministry of Agriculture. The Partnership will be launched by the European Commission in 2023. The CSA ***“FOODPathS: Co-creating the protoype Sustainable Food Systems PArTnersHip”*** is currently starting in order to support the process of partnership development.

Involvement. Mipaaf and experts contributed to the partnership document of the Safe and Sustainable Food Systems for People, Planet and Climate, which aim to develop an R&I platform for food systems connecting different european platforms and R&I programmes at local, national and european level in order to support the transition towards European sustainable Food Systems by 2030.

Partnership AGRIDATA (Agriculture Data)

Objectives. The Horizon Europe Partnership “Agriculture of Data” (AgData) aims to support a **sustainable agriculture in Europe** as well as strengthening **policy monitoring and evaluation** capacities, by using the potential that **digital and data technologies** in combination with Earth observation (EO) and other environmental and agricultural **data offer**.

State of the Art. The core group working on the partnership is coordinated by Denmark, Spain and Italy. After a first survey and workshop in May 2021 and a couple of other consultation workshops with stakeholders took place in December 2021 during the process of partnership document development. It is now time to **develop the Partnership Strategic Research and Innovation Agenda (SRIA)**. The Agriculture of Data Partnership will be launched by the European Commission in 2023.

Involvement. MIPAAF, together with MUR, is part of the Core Group who developed the partnership document, and it is actively working in the development of the Strategic Research and Innovation Agenda (SRIA) of the Agriculture of Data Partnership. This activity is combining the knowledge and experience developed by MIPAAF in the ERA-NET ICT-AGRI-FOOD action and by MUR in the ERA-NET ERA PLANET.

Partnership Animal Health & Welfare (PAHW)

Objective. deliver key knowledge, services and products to significantly improve the control of animal infectious diseases and animal welfare in a coordinated way which will sustain animal production and protect public health. It will involve reference laboratories, funding agencies and cooperate with the private sector. PAHW foreseen research activities performed both through (mainly) external, open calls, plus activities performed internally.

State of art. The Dossier proposal have been submitted in April 2022. In May 2022 will be known **volume of commitment and Ratio in kind vs cash.** Further drafting of SRIA in collaboration with ICRAD and the 4 working groups before summer; consultation process of stakeholders until end 2022.

Involvement. Mipaaf and experts contributed to the partnership document (technical and management aspects) and will participate to the research activities that will be activate within the PAHW.

Very early stage for the future partnership Forestry (Possible launch in 2025-2026)

SCAR FOREST (Strategic Working Group on Forests and Forestry Research and Innovation)

1. **HORIZON-CL6-2022-CIRCBIO-01**
2. **HORIZON-WIDERA-2022-ERA-01**

2 actions (RIA and CSA) promoted by SCAR FOREST (Strategic Working Group) are under evaluation to better define a setting up of the Partnership on Forestry and Forestry based sector

Thank you for your attention
