greenet

The GREENET project has received funding from the European Union's Horizon Europe programme under grant agreement No 101069604

Founded in 2019 as an initiative of the European Institute of Innovation and Technology (EIT), a body of the European Union, EIT Urban Mobility is committed to accelerating the transition to sustainable mobility.

EIT Urban Mobility accelerates the sustainable urban mobility transition by providing established businesses, startups, universities, research institutes and the public sector with access to markets, talent, funding and knowledge. It empowers its partners to develop and deploy new solutions that address the mobility challenges European cities face.

EIT Urban Mobility works in partnership with over 250 organisations and collaborate with a wider network of more than 1,100 organisations across 35 countries. Their work supports the vision for sustainable and decarbonised urban mobility and more liveable urban spaces for all.

Objectives

The EIT Urban Mobility programmes support the vision of creating more liveable urban spaces. By fostering innovation and transformation, EIT Urban Mobility can improve people's quality of life, decarbonise mobility and make Europe's economy more competitive.

To achieve these goals, they focus on twelve different sectors in which they believe their community has the potential to innovate and create impact:

- Public transport
- Health and Mobility
- Electrification of Transport and Alternative Fuels
- Mobility Data Management
- Public Space Design
- Urban Vehicle Access Regulations
- Mobility Planning
- Urban Logistics
- New Mobility Services
- Cooperative, Connected and Automated Mobility (CCAM)
- Road Safety
- Parking and Curbside Management

Funding opportunities

Take a look at the Call Programme 2025.
