

The Just Transition Mechanism

@ncp_greenet

greenet

The GREENET project has received funding from the European Union's Horizon Europe programme under grant agreement No 101069604

The Just Transition Funding Sources are Cohesion Policy instruments. They run under the [Just Transition Mechanism](#) in the context of the [European Green Deal](#). It is a key tool to ensure the transition towards a climate-neutral economy leaves no one behind. Mechanism is a targeted support & mobilising around **€17,5 billion over the period 2021-2027**. Through these three instruments:

- [Just Transition Fund \(JTF\)](#)
- [InvestEU "Just Transition" scheme](#)
- [Public Sector Loan Facility \(PSLF\)](#)

Objectives

All three funding sources share a common core component: [the European Green Deal](#).

The Just Transition Mechanism tackles the social and economic impacts of the transition by concentrating on the regions, industries, and workers that will encounter the most significant challenges.

These three funding sources are designed to provide tailored support. While their objectives align, they operate differently, and the eligibility criteria may differ.

Main Tools: Financing and Advisory Opportunities

JTF has identified 27 regions eligible for **Grants** 2021-2027, find your managing authority [here](#).

Just Transition Platform promotes sharing of **knowledge and exchanges of best practices** between just transition stakeholders, including via the [JTPeers Experts and Exchange programme](#) and [JTP Knowledge Hub](#).

[JTP Groundwork](#) is a **Capacity Building Support** delivered within the Just Transition Platform (JTP) by the European Commission. It helps the Just Transition Fund (JTF) regions to implement their Territorial Just Transition Plans (TJTPs).

[InvestEU](#) has Public & Private **Strategic Investments**. Investment target by 2027 is 372 billions.

[Public Sector Loan Facility](#) provides **Loans** to support regions, sectors and communities heavily dependent on carbon-intensive industries and funds projects addressing social, economic, and environmental challenges arising from the transition.

How to find synergies between Horizon Europe's CL5 and JTFS projects ?

Under InvestEU you can find [the Advisory Hub](#), their main objective is to support the identification, preparation and development of investment projects across the European Union. Together with the [InvestEU Portal](#) – the EU's online matchmaking tool – they aim to strengthen Europe's investment and business environment.

There are support projects funded by the EU offering free assistance under the **PSLF** :

- [Technical assistance for a green energy transition \(TARGET\)](#)
- [Joint Assistance to Support Projects in European Regions \(JASPERS\)](#)
- [Technical Support Instrument \(TSI\)](#)
- [European Local Energy Assistance \(ELENA\)](#)
